Louisville Manufactures. GAS AND STEAM FITTING AND PLUMBING.

These important branches of manufacture are arried on by several houses, who combine with these the casting and making of steam engines, boilers and all other kinds of work generally conducted by machinists. The principal houses who make these branches the principal ones of their

business are named below. There has been a rapid increase in the number f persons engaged and the amount of capital employed in the business of gas fitting, which is attributable to the extension of gas in the city, and the fact that it has grown almost into universal use. A like result has more than satisfied the expectations of steam-fitters, and proved contingent to the increase of the river boats made here and elsewhere. Many large and heavy plumbers' jobs have, in the last two or three years, been ompleted by local houses, besides a vast amount of heavy and light work in adjacent country and iver towns. The large and heavy distilling tanks or stearine and coal distillation in this city and Hawesville have been lined and re-lined by our ocal manufacturers. Besides these important orks, our hotels have been steam and gas-fitted by our own workmen, and in such a manner as to ender the work equal in every respect to any put

ip elsewhere. In connection with these, it will be found that the manufacture of all kinds of brass and patent netal work is carried on, forming, as it does, a ortion of the business. All kinds of gas and team fixtures are cast and turned by our fitters. including among other articles "stop and valve "force and lift and ale pumps," "soda stands and coolers," "bath tubs," and brass and castings of numerous patterns. At some of the establishments gas fixtures are regilded and galvanized, rendering them almost as good as new. We find that gentlemen are already making

preparations to increase their capacity by the time of the completion of the water-works. There is already a large and varied assortment of lead and iron pipes on hand. One or two establishments have lately commenced operations .-Among these we may mention Messrs. Donaly & Strader, who have been in business about six months, and who, though now working eight hands, say they have as much to do as they can complete. The gentlemen are active business men, practical workmen, and devoted to the inerests of the city in whose midst they have lately ccated.

Messrs. Thomas Williams & Co. have lately added the making of a superior press for counting house purposes, which is the patented property of rolled over several times, but wasn't hurt. a company who have lately formed for the purpose of putting this article before the business WE have on hand a well selected stock of Drugs, Chemicals, and Pharmaceutical Preparations, which we guarantee of the best quality.

In all the branches of the steam and gas fitting and plumbing business there are 65 men and 20 boys engaged, all actively and constantly at work. They are paid large wages, and as their business requires a knowledge of many chemical truths, they are, as a general thing, of that intelligent class which makes the "bone and sinew" of population respected for something more than mere "muscle." The entire business, which is carried on upon a capital of \$50,000, does not ual had been seen there the evening before. fall short of \$175,000. The increase which will come with the completion of the water works. practical men inform us, will reach fully as much more. A like increase of the workmen will make this business one of great importance and credit to the city. The steam and gas fitters are:

consideration the action of the City Council which curtailed the county clerk's office of its fair proportions by dividing it with a partition wall. The board resolved that the wall ought to be rewere passed by the board of justices:

Resolved, That it is the opinion of this court that the rooms intended by the General Council of the city of Louisville for a clerk's office for the clerk of this county court are insufficient in size and point of light.

Resolved, That the General Council ought to remove the partition wall that they have recently put up in the county court room; and that when it is so removed and the rooms and those adjoin-ing are finished and completed according to the original design, except said partition wall, this court will receive it as the county court clerk's

PARODI'S OPERA TROUPE .- Manager Charles Barras gave a week of grand opera at Cincinnoti last week with the celebrated Parodi Italian opera company, numbering some eighty performers. During the engagement he produced in a style better than it has ever been done before in America, Donizetti's grand opera of Il Polinto or the Martyrs, and other novelties, among which was the debat, under his immediate auspices, of Mrs. Charlotte Varian James, an American, in Rigoletta. With the exception of the occasion of These scamps will be heard of again. the debut, the patronage was not commensurate with the heavy expense inseparable from such an opera house and such a company, and prefering to wait until the public awakens from its present apathy, he brought the season to a close after the first week, prefering to trust to the superior musical taste of our city, whither he has sent the company, which is really one of the finest we have yet listened to. The following are some of those who belong to the company: Signorita Caroline Alaimon, soprano; Signorita Teresa Parodi, mezo soprano; Sig. Sbriglia, tenore; Sig. Gnone, baritone; Sig. Bellini, contralto; Sig. Bellini, basso buffo ; Sig. Barili, basso ; Sig. Toviani, conductor; sixty performers, full chorus and orchestra.

We would call the special attention of both city and country buyers to the second large cash sale of fall and winter dry goods, commencing this morning, Tuesday, at 10 o'clock, at the auction rooms of Messrs. S. G. Henry & Co. We are requested to mention that at half past 10 o'clock precisely, they will sell a large and splendid lot of heavy coatings, all wool and union cloths, farcy side stripe cassimers and sattinets; and at 12 o'clock, a large invoice of A No. 1 linen'bosom and Marsailles shirts, bleached drawers, and gents' merino underwear, to which the special attention of clothing merchants is called. The sale will be continued at 2 o'clock in the afternoon.

Col. Richard Phillips sells to-day his beautiful farm, situated about four miles from the city. This property has been cut up in twenty acre lots, each one a fine site for a country seat. Omnibuses will leave Kennedy & Co.'s office, Fourth street, opposite Masonic Temple, at 10 'clock, conveying all to the place free of charge.

Passing Bogus Coin .- It is believed there has been in this city a concerted effort of some men, who cheat their fellow men for a livelihood, to put off bogus gold and silver coin. A number of pieces have been passed on several persons. A man named Frank Gregory is now in arrest, implicated in the thing, but no investigation of his case has yet been had.

THE ABDUCTION CASE .- Charles Miller, the hackman, who was charged with abducting a young girl, was discharged in the Police Court yesterday. The father of the girl stated to the Judge that he had sent his child away, and positively declined to prosecute the man, who departed with moved, and the committee from the City Council a smirk on his phiz. If there had been any law concurred in the same. The following resolutions to reach him, we reckon he wouldn't have got off so cheap. SHARP NIGGER .- John Hardin, a free negro who

has been an inmate of the Louisville workhouse divers times, recently stole a horse in Shelby county. He was arrested at Simpsonville on Sunday, and two men were employed to keep watch over his niggership. In the night, however, the watch went to sleep, and the nigger didn't, bu robbed one of them of \$25 and his coat, and decamped forthwith. A good joke. He is very apt to make his way into his old haunts in this city.

BOLD RASCALS .- Two men attempted to get into the house of J. B. Russell, on Chestnut, between Second and Third streets, yesterday morning. They were on a ladder, and were about entering a second story window, when the noise awakened an inmate of the house, who gave the alarm. The rascals slid down and vamosed, leaving the ladder behind. There is a lamp immediately fronting the house, and the gas was lit at the time

morning, Fred Welshofer and M. D. Miller had some words on Market street, above Fifth, which resulted in the former slashing a knife into Miller's shoulder. Miller struck his adversary in the face, who cut him in the thigh, inflicting an ugly gash, and then fied. He was caught after running several squares, by Tom Ervin, a private watchman. He was held, yesterday, for a misdemeanor, the wounds of the injured man proving to be given by the square of the state of the square of the squa or, the wounds of the injured man proving to be not at all dangerous.

SWIFT SHOOTING .- John Rodgers, of the down down Portland avenue, when Thos. Swift, who was standing in his own door, fired a pistol at him, and the ball cut his pants below the knee and grazed the skin. Swift had a difficulty previously with some drunken chaps, and said he thought Rodgers was one of them who was returning to "charge on his house." The case was up in the Police Court yesterday, and laid over.

A MAN OF FORTITUDE, NOT FEELING.-We have published accounts of Mr. James A. Stevens, who advertises in the bills of the day that he is the wonder of the world." He drives pins in his legs, cuts his fingers to the bone without flinching, and it immediately heals-drives an awl through his wrist apparently without the quiver of a nerve-nails through his feet, and knives

through his cheek, and other wonderful things. Last night at the Galt House he "exhibited" to select few some of his operations, such as driing an awl through the wrist, sticking pins in his thighs, &c. We know he did it, because seeng with our own eyes convinced us. He also says he could insert his knife, &c., in the flesh of others without pain. We have faith that he can perate on himself as he says, and equally as such that he won't on us. The subject is worth the investigation of medical men, for it certainly cannot be mere insensibility to pain. We believe he proposes a public exhibition in this city, but where we are not advised.

THEATER.—There was a good house at the opening last night. Both the new actors and those whose faces were familiar were welcomed to their places on the board. The audience seemed deighted to return again to the soul stirring scenes of the true drama and the care dispelling humor of genuine farce. The majority of the company appeared on the stage during the performance of the two pieces, and from the general satisfaction afforded, we may predict for them an unbroken popularity during the season. There is no doubt but they are the best stock company Louisville has seen these many years .-Every one of them fills his or her part in a praiseworthy manner, while some of them rise to a degree of excellence that would meet with approbation in any theater. We are unable to give the details of last night's performance, owing to the lateness of the hour, but shall take pleasure in mentioning individual merit hereafter. It left that city at six o'clock in the morning, and reached here about eight o'clock Monday evening, being less than sixty-two hours on the route. Central American Affairs -- Col. Forney in Trouble-Movements of Soule—Donglas Intriques against Administration Office Holders, &c., &c.

[Secial Dispatch to the Cincinnati Gazette] The special Washington dispatch of the New Professor Dimitry; the new Minister to Central America, left Washington last evening for New York, and will sail in the steamer of the fifth for York, and will sail in the steamer of the him for Central America. The aspect of affairs in Central America, as far as the ratification of the treaty is concerned, is entirely satisfactory to the Admin-istration. The form, however, which the Martines decree has given to the question of the free transit toute, leaves an appearance of still lingering diffi-culties. Time, we trust, will solve them in an

equally satisfactory manner.

Forney is just now in a most pitiable situation, with nothing to hope for from the Democratic party. After having been thrown overboard by the President, on account of his exorbitant demands, with no valid or reasonable excuse for deserting Judge Douglas, now that his prospects are brightening, he is totally at a loss for an occasion to desert the Republican ranks. His cause is an regent one, as he desires to be received into full communion in the Republican church, previous to the organization of the next House, that he may become a legitimate candidate for He sees that the controling influence in the

By the overland arrival at St. Louis we have ull intelligence concerning the difficulties about the invasion of San Juan Island by the American

troops. The following letter in the San Francisco l'ines explains the whole matter: THE INVASION OF SAN JUAN ISLAND.

VICTORIA, V. I., August 7, 1859. Editors Daily Times: You are, perhaps, aware before this that while you have been absorbed in olitical controversies at home, or watching the events of the great world in the far East, war, with all its attendant evils, has been threatened here in the distant North.

Some weeks ago, came to this port, on the U. S. S. Massachusetts, Gen. Harney. His arrival was acknowledgad by a salute, and, after a day's

sojourn as the guest of Gov. Douglas, he "passed by on the other side."

A few days after the General's departure for Puget Sound, our town was thrown into the great-est excitement by the news that a company of American troops had seized the disputed island of San Juan, and that barracks were being es-tablished upon it. No one knew by whom the act tablished upon it. No one xuew by whom the ac-was authorized, and especially did certain chival-ric Americans, with fillibustering proclivities, seem not to care. Then commenced blustering and bloviating on both sides, the American population waxed rampant, as usual on such occasions, and the British indignant. Numerous lively discussions sprung up among groupes of citizens at the street corners, and a considerable amount of the King's English was demolished on both sides.

Very soon vessels for the conveyance of passengers to the seat of war were in demand. Small boats were chartered for the trip, and several steamboats departed with visitors. and Americans, to the Island of San Juan, a distance of fifteen or twenty miles from this place.— Two of the English vessels of war from Esquimalt harbor, had gone over on the first reception of the news. Most of those who went to the island did so, perhaps, through curiosity; but others, no doubt, went determined to lend a hand to their respective countries, if their services were needed. In the harber of San Juan were found, sides several British men-of-war, the U. S. ships Massachusetts, Shubric, and a Revenue cutter from Puget Sound. A company of American soldiers, to the number of forty or fifty, had taken possession of the island, and quite boldly indicated their intention to keep it, as it will be seen by the following order, which was posted in various

places about the island.

"MILITARY POST, SAN JUAN ISLAND, W. T., July 27th, 1859. [ORDERS No. 1.]

I. In compliance with orders and instructions from the General Commanding, a Military Post will be established on this island, on whatever site the Commanding Officer may select. II. All the inhabitants of the Island are re-

uested to report at once to the Commanding Of-icer, in case of any incursion of the Northern indians, so that he may take such steps as he may deem necessary to prevent any future occur ence of the same.

III. This being United States Territory, no aws other than those of the United States, nor courts, except such as are held by virtue of sa'd aws, will be recognized or allowed on this Island. By order of CAPTAIN PICKEY.

JAMES FORSYTH. 2d Lieut., 9th Infantry, Post Adjutant." It will be observed from the tone of this order hat it ignores the treaty and Boundary Commision, and admits of no compromise; if, therefore, t proves to have had no higher authority than en. Harney, and any concession is hereafter ade, it will afford another example of the reckess manner in which fillibustering American citi-tens jeopardize the peace and compromise the honor of their country.

A proposition to that effect having been made, was rejected, but it is believed will yet be acceded to. It is unnecessary to repeat, that if such a concession is made, after what has passed, it will be a dastardly compromise of the ountry's honor.
Affairs have rested in this plight, with little change, during the past week. A small company

writers in the Colonist.
The Pioneer and Democrat commends the action of Gen. Harney in taking possession of San Juan Island. It says:
"The treaty is based upon the principle that all south of the parallel of forty-nine was United States Territory, and the deviation made was simply to give Vancouver's Island—only a very small portion of which was south of that parallel—to that country, who, had the line continued directly across it, would have owned the greater portion of it. If, then, the question were one of doubt as to the proper channel, a consideration of the intent of the treaty must solve that question in favor of the United States.

But it is not a question upon which a doubt But it is not a question upon which a doubt should be permitted to exist. The Canal de Haro is the broadest, deepest, and most direct channel from the Straits of Fuca into the Gulf of channel from the Strates of ruce into the dust of Georgia. And this would not be questioned were it not for the value of intermediate islands. To England they are valuable as well for the land, of which there is much of a superior quality on some of the islands, as also that they are sup-posed to command the southern entrance to the Gulf of Georgia. To us they are necessary as a military nost, being the only place suitable for the military post, being the only place suitable for the protection of our own people from the hordes of Northern savages, from whom we have already suffered, and from whose threatened attacks many post. Territorial Sovereignty. Having disposed of the arguments in favor of popular sovereignty, derived from the supposed analogous condition of the old Colonial and the present Territorial governments, we shall propositions assumed by Judge Douglas in his reconcerned, they certainly cannot be relied on to sustain the views of Judge Douglas, and he must, therefore, discover some other mode of elucidating his favorite dogma of squatter-sovereignty, or else abandon it as alike unwise and unstates-

The Territories of the United States are held by the General Government in trust for the by the blood and treasure of the people, and in them the citizens of every State should be equally protected in their rights. The citizen of Ohio should be permitted to migrate thither with his property, and be protected in its enjoyment, and the citizens of Kentucky should enjoy a similar right. This is fair both to the people of the North and the South .-The inhabitants of the Territories are settled on lands belonging to the States, and they should not seek to discriminate against the rights of any State. They live under a government purely temporary, and should not attempt to make permanent institutions. The extent of the power of Territorial authority should be to protect, not to establish or prohibit rights. This is the fair and gitimate extent of Territorial authority, and so long as restrained within these limits, will not be questioned or opposed by the people of the South We can see no reason in the doctrine of Terri-

torial Sovereignty. We do not know where it commences or where it terminates. A Territorial Government is derivative and complex. Congress breathes into it vitality, by the passage of an organic act. This is a pure act of intervention on the part of Congress. That body intervenes and declares what shall be the boundary of the Territory, who shall constitute its legislature, and time and again it has required that all Territorial laws should be under its control and supervision. As late as 1848, in the Oregon bill, an article was inserted, providing that "all laws passed by the Legislative Assemsembly shall be submitted to the Congress of the United States, and if disapproved shall be null and of no effect," and, if we mistake not, this bill was voted for by Judge Douglas.

The judicial and executive departments completely under the control of the General Government. Their term of office, and the duties ap pertaining thereto, are marked out and limited by Congressional enactments; and the offices are filled by appointees of the Federal Executive. It is, then, very certain that neither the judicial nor the executive branch of a Territorial government is sovereign. Where, then, does Territorial sovereignty begin? Does it commence with the Legislative Department, and is it possible that that department is sovereign, whilst the other coordinate departments are not sovereign? If so, then there exists in a Territory a divided sovereignty-a species of government which has no ex-Even Judge Douglas has, on various occasions,

shown in his discussions of this question that he did not regard Territorial governments as sovereign. He declared in his celebrated Springfield speech, that Congress possessed the right to repeal the act of the Territory of Utah, and could and thereby destroy not only its sovereignty, but even its Territorial existence. In his speeches on the Lecompton question, he held that the sovereigns of a Territory did not possess the legal Congress-it being essential for Congress to pass an "enabling act," allowing them to do so; and, urthermore, he held in this same discussion that he people of a Territory should determine their stitutions not in their own way, but in the way ngress should determine for them. This was shown also in his arguments against the admission of Kansas under the Lecompton Constitution, because, in the exercise of their boasted "covesignty," the convention did not submit the constitution to popular ratification, as Judge Douglas pretended to desire they should have done. Such were Douglas' ideas of Territorial sov-

ereignty prior to 1859. This is the sovereignty of which he is the especial champion and expounder-a sovereignty existing alone at the mere discretion of Congress. And yet Judge Douglas, even as late as last year having advocated the most unwarrantable Congressional intervention in several instances during the Kansas controersy-at one time having gone so far as to be willing to saddle a State constitution on the people of that Territory without their consent-now roclaims himself the peculiar apostle of non-in-

The Kansas Nebraska act, embodying the repeal ritories. But this is not so, and with Judge the repeal of the Missouri Compromise was accomplished by that measure; but what of that?

The Supreme Court, whenever an opportunity

Harper's Magazine for September amounts to less, by several hundreds, than usual. This must be mortifying to the friends of Mr. Douglas as well might have been afforded, would have declared that measure to have been unconstitutional, and, consequently, null and void. So, then, the South ctually gained nothing by the Nebraska-Kansas bill; but, on the other hand, Judge Douglas contends that, in that measure was conceded to the Territorial inhabitants the right to determine on the existence or the non-existence of the institution of slavery, thereby virtually surrendering the Territories into the hands of the first settlers, who, as a general thing, would oppose the intro-

on the Dred Scott case as having no bearing on the subject of slavery in the Territories, and whilst he recognizes the correctness of the decision that Congress does not possess the power to abolish slavery, he yet contends that the decision does not, and was not intended to apply to the Territorial Governments.

Strange to say, however, in the middle of the very extract frem the Dred Scott decision, which Judge Douglas quotes to sustain his position, it is affirmed, we think with clearness and distinct ness, that a Territorial Legislature cannot abolish slavery, or discriminate against it by passing unfriendly laws. We subjoin the extract from the opinion:

"And if Congress itself cannot do this—if it is beyond the powers conferred on the Federal Government—it will be admitted, we presume, that it could not authorize a Territorial Government to exercise them. It could not confer no power on any local Government testablished by its arbitrary.

"And if Congress itself cannot do this—if it is beyond the powers conferred on the Federal Gov-ernment—it will be admitted, we presume, that it could not authorize a Territorial Government to exercise them. Here, then, the very quotation made by Judge Douglas to sustain his view, fails most certainly to do so. Examine the argument of the Supreme ourt. Congress cannot abolish slavery, therefore it cannot authorize a Territorial Legislature to do so; and then the decision is even more explicit when it declares that "no tribunal acting under the authority of the United States, who under the authority of the United States, whether it be LEGISLATIVE, executive, or judicial, has a right to draw such distinction, or to deny to it [slave property] the benefit of the provisions and guarantees which have been provided for the protection of private property against the encroachments of distinctions. The Douglas Essay. The Richmond Enquirer gives the following interpretation to Senator Douglas' essay on popular

sovereignty: Since then, we have found Mr. Douglas venturing upon another field of discussion, on the merits of which we are obliged to separate from him, indeed, to stand in uncompromising difference, on a point also involving the question of State equality and also involving the question of State equality and the entire slavery question, in the phase which it finally assumed. As explained with sufficient ex-plicitness in his last publication, the position as-serted by Mr. Douglas now is, that the residents of a Territory may rightfully and legally, through the action of a Territorial Legislature, exclude the ntroduction of slave property into a Territory, or abrogate the right to hold slaves slready intro-duced; and that neither the Congress, the Executive or the Judiciary of the United States can ightfully intervene to protect slave property from such hostile action of mere Territorial authori-

We have already repeatedly urged upon the attention of our resders this doctrine as even more practically and effectively subversive of the Constitutional rights of slaveholders than is the doc-trine maintained by Mr. Seward and his adherents of the Black Republican party. Mr. Seward holds that Congress may rightfully exclude slave property from the Territories. Mr. Douglas contends that this power resides in the local authorities of

each Territory.
So far, then, as the great question of principle involved is concerned, there is no material difference between Mr. Douglas and Mr. Seward. Both deny the inalienable right of the citizens of each State to enjoy, on Territory common to all States, every species of property which any citizen may lawfully hold within the limits of any one of the States. Mr. Seward attributes the power to abrogate this right to a great federal legislative body, where the attempt would be met with the streng ous opposition of a full body of Southern repre-sentatives, whose action and deliberation are con-stant subjects of watchful attention and jealous mment to the whole people of the Union. Mr. and obscure local authorities, among whom the slaveholders of the Union may be altogether ex-cluded even from partial representation, whose members and constituencies are comparatively iresponsible.

Certainly, Mr. Douglas' doctrine is equally ob-noxious in theory with that of Mr. Seward, and nuch more easily reduced to practical adoption,

U. S. SENATOR .- Now that our State election is over and the Opposition is demolished, some of our cotemporaries are speculating upon the probable action of the Kentucky Legislature in the election of a U. S. Senator to succeed Hon. J. J. Crittenden. Each secton has its particular favorite. who, of all others, is the very best man calcula-ted to fill the high position, and we may expect some warmth in the discussion upon the question of the succession. The Democratic party embraces within its bosom many men, in all parts of the State, who are eminently qualified to fill any office, however exalted, known to our Constitution and laws. But judging from some remarks in last weeks Press under the caption of "What Next," the editors of that paper are in favor of instituting a geographical test, and make the election turn not upon qualification and merit, but upon the particular situs of the aspirant. They argue that as we have a Senator from this end of the State, that therefore the next Senator must come from the other end. Such a test is unknown to our Constiution and laws, and such a principle has never been recognized neither by practice nor precedent.

An equal distribution of the office among the different portions of the State may sound very well in theory, but its practical demonstration has never been attempted heretofore, and it would not, in all probability, be thought of now, but for the fact that the Hon. Linn Boyd is expected to be a candidate for U. S. Senator, and he is in the way of some special favorite of the Press, who hails from a different portion of the State. It matters not so much with the party whence comes the next Senator as it does that he should present a clean record and be free from the taint of the peculiar views of Stephen A. Douglas .- Canton

We copy the following from the Maysville Express, and heartily indorse every word of it .-Johnson is deserving, and has had experience as clerk, and we hope he will be elected to the position named:

J. H. Johnson is a candidate for Clerk of the Senate of Kentucky. Johnson is thoroughly competent to discharge the duties of this office. He needs its emoluments. He expects to be elected. But that is not all. He is a good Democrat. He is a worthy man. Nor is that all. He head done is a worthy man. Nor is that all. He has done as much service in behalf of Democracy as any man of his age in the State. The columns of alat any session. Property needs stronger and most every paper in Kentucky bear evidence of his ability. At various times, in the last ten years, he has been connected with the Frankfort Yeoman, Lou. Democrat, Lou. Times, Lou. Courier, Lexington Statesman, and Cynthiana Age; and his vigo.ous, pointed, telling articles, have of the Missouri Compromise, it was thought had been read by almost every Democrat in the Com-forever settled the question of slavery in the Ternot unreasonable that he now expects promo

Louisville, March 16th, 1858.

We, whose names are hereto attached, would respectfully state that Louisvile and vicinity, have heretofore been entirely dependent upon river navigation, obstructed by ice a considerable part of the winter, and the low water in the summer, together with the heavy losses incurred by sinking and wrecking of boats, has caused the price of Coal to rule high, which has been a serious drawback to our manufacturing interests, to overcome these difficulties we have necessarily to look to the coal fields of Indiana, the nearest of which, approximate to within 75 or 80 miles of the Falls of the Oxio river; the coal and iron lands situated on both sides of the Ohio and Mississippi Railroad, in Martin County, cannot be considered otherwise than valuable, especially those now offered for sale by Jas. H. Shields and Jas.

A. Doll, as we are informed that their lands are the mest accessible to the road, and can be brought into use at much less outlay than any other coal or iron lands in Martin county.

HOLLOWAY'S OINTMENT notes superficial evaporation, lends activity t

the absorbents, and cleanses the blood; and thus, by the three processes of exhalation, absorption, and disinfecon, cures all sores and eruptions. Bold 80 Maiden Lane, N. Y. SORE THROAT PLAGUE AND SORE THROAT .- This quality of seizing hold and causing the expulsion of deprave umors, is possessed by no other medicine than Bran-DRETH'S PILLS. They operate only upon the tissues involved in, that is affected by the disease. In fact, they selze upon those humors, and not so much from preference as from natural affinity, because their life is below that of the surrounding parts, and which, settling or the tissues of the throat, that is, around the throat region, produces sore throat, sore throat plague, and the severe headache and fever. Within an hour after four or six pills are taken there is felt a peculiar creepng in the part affected, a sort of collecting up of th diseased humors ready for expulsion. No hurt or weakening effect can ever arise from their use, because they cannot act upon healthy parts. Taken early they prevent all organic diseases. Oh. how important in sickness, to use that medicine which only extinguishes the disease, and leaves no evil effects behind.

SAVE YOUR GARDENS. Mr. E. Lyon, a French Chemist, discovered an Asia c plant, the powdered leaves of which is a deadly poison to garden worms, ants, roaches, bed bugs, ticks fleas, and all species of Insects, while it is perfectly armless to mankind and domestic animals. A child can eat it. He has received medals from Russia, France, England, Germany, and numerous Medical

Colleges and Societies. It is a most important discov ery. The idea of being rid of these pests in warm weather is a luxury. The importance of a reliable article of this kind is inestimable. In warm weather all nature teems with these annoying foes. This powder is the only article ever discovered which will exterminate them. A company of botanists, from the Horticultural Society of Paris, while aimfast the ferns of Asia, observed that all insects lighting upon a certain kind of plantvery soon dropped dead. This fact was made use of to guard their night camps from these intruders. Quantities of the plant were brought home by Mr. E. Lyon, and found a positive in sect destroyer in every experiment. JOHN BULL'S

COMPOUND PECTORAL OF

WILD CHERRY.

THE seal of public approbation has been so unmis-taskably fixed upon this medicine that the proprie-tor feels it to be his duty to call the attention of all those persons to it who are suffering from, or threatened with, affections of the lungs or throat. Its basis is the active principle of the Wild Cherry Bark, but it contains also, in proper proportions, other of the most efficient pecto-

principle of the Wild Cherry Bars, out it contains also, in proper proportions, other of the most efficient pectorals of the MATERIA MEDICA. Its component parts and proportions are well known to physicians everywhere, as the proprietor makes no secret of them, and they have met the universal approbation of 'he faculty, who, as a general thing, prefer using this preparati n to any prescription which they can have prepared by a drug-

gist. It can be procured from druggists and country stores

perywhere.

THE GREAT VITAL REGENERATOR, MR. E. LYON—Dear Sir: We have analysed and tested your Magnetic Powders, and find them perfectly harmless to mankind and domestic animais, but certain death when inhaled by bugs, ants, and insects.

LAURANCE REID, Prof. Chemistry, N. Y. Hospital.

Mr. John L. Rome, Superintendent of the New York Hospital, says, "the has expelled all the bugs, ants, roaches, moths, etc., with Lyon's Powder, and finds it of immense value."

Every gardener and house-keeper must have a direct interest in an article of this kind. Reference can be made to the Astor. St. Nicholas, and Metropolitan Hotels; to Judge Meigs, President of the American Institute; James Gordon Bennett, Gen. Winfield Scott, Cyrus W. Field, L. M. Pease, of the Five Points Mission, etc., etc. Judge Meigs says, "This discovery of prof. Lyon is of national importance. The Farmers' Club have tested to the condity. It will destroy locusts, grasshoppers, ants, moths, bugs, and all vermin. Garden plants can be preserved, and houses made pure."

Arrangements are now made, through Messrs. Barns: & Park, of New York, to have it sold throughout the world. Many worthless imitations are advertised. Be cautious!

THE season is at hand when these scourges of childhood begin to become both troublesome and dangerous. DR. JOHN BULL'S VEGETABLE WORM
DESTROYER is a remedy alike pleasant and effectual
for the evil. There is not the least difficulty in getting
children to take the medicine. It is prepared in the
form of Candy Drops, and will be eaten with avidity by
children of all ages. It destreys and expels worms
more effectually than any remedy now in use, while at
the same time it will in no way affect injuriously the
health of the child.

THE FAIR PLAY-VICKSBURG AND SUN FLOWER PACKET-FOR NEW ORLEANS .- This evening the Fair Play, the new boat just built by Captain G. W. Carras for the Vick-burg and Sun Flower trade, starts South on her first trip. She is a very neat, staunch, handy boat, built expressly for tha trade, and will no doubt prove the best to her size that ever turned her bow up the Yazoo or Sun Flower. She is a compact, well fitted and comortably farnished side wheel boat, with a really beautiful cabin, and accommodations for fifty passengers with state rooms. All the rooms are large, and each is conveniently arranged and fur mished with the best bedding, superior spring mattresses, and mosquito bars, all made by the enterprising firm of Marshall & Dickinson, Fourth street. The carpets and other outfits were furnished by the long established house of C. Duval & Co., Main street. The cabin and her furniture were all made by John Simeor, and the crockery &c., by Casseday & Hopkins.

The hull of the Fair Play was built by Sam King, of Jeffersonville, who has no superior, it an equal, as a ship or boat builder. It is 135 feet straight, or 141 feet in length on deck, with 27 feet beam, 25 feet floor, and 5 feet hold, making her draught, light, only 2 feet, and a carrying capacity for 350 tons, or 1,400 bales of cotton. The engines were from the foundry of Hawley, Bilngs & Co., and are two in number, each 14 inches in diameter, with 5 feet stroke, working a good-sized water-wheel, and having two boilers, each 22 feet in length, and 40 inches in diameter. The engines were made by John Pearce, a faithful workman. In addition, she has a superior doctor engine. The cabin was the work of W. H. Downes, and the painting by John Briner. The copper work, stoves, &c., were all made by Wright & Bridgeford, who are constantly engaged in steamboat work. The iron work, all complete, was by A. Baker, a very faithful workman. The rigging and blocks were arranged by Sid. Smith; the whole under the superintendence of Capt. Carras, who has had considerable experience both in building and commanding boats. This is his service, comfort, and money-making.

The Fair Play starts to New Orleans this evening, in charge of Capt. Carras, assisted in the clerk's office by Ned. Outlaw, a very clever and experienced boatman. Passengers will find the Fair Play a comfortable boat. She is at the city

The S. P. Hibberd, Capt. J. B. Archer, is

due from Cairo this evening. She is advertised to return to morrow evening. THE JOHN GAULT .- This favorite packet is due

from Cairo to-day. She is the regular Wednes-day mail packet, in charge of Capt. Joseph Bunce, a popular boatman, and passengers and shippers nust bear her in mind. A New Orleans paper the other day stated at the Fleta, the new Red river boat built by

Capt. Barnes, "made her trial trip at New Alba-ny, running a few miles up the river and back." That's news! How did she ascend the falls and "back?" The same paper says the "Licking and Kentucky rivers were pouring out quantities of drift wood," which would "throw those of drift wood," which would "throw those streams open for unobstructed navigation." How far does navigation extend up Licking? Better buy a geography, or turn honest—quit stealing from the Courier—give the credit due, and then your readers may not think you a "foo-foo!" A Novel Tow-Boat .- We copy the following

notice of a new sort of low pressure tow-boat, recently built at Pittsburg, for Messrs. Watson. recently built at Pittsburg, for Messrs. Watson.

PROPLIER R. & J. Watson No. 2.—We visited this unique water craft on yesterday. She lies above lock No. 1, on the Birmingham side of the Monongahela river. The boat is owned by the brothers Watson, who reside in this city, Losisville and New Orleans, and is designed for several useful purposes not hisherto fully provided for in craft of this description. The hull is 108 feet on deck, 20 feet beam and 9% feet hold. The engines are 21 inch cylinders, two feet stroke; boilers 20% feet long, 41 inches in diameter, with a running pressure of 70 pounds to the Inch. The boilers contain steam chimneys, with four flues each, designed for giving the steam its full expansive force and economising fuel. Attached to the engine is one of Worthington's pumps, which is calculated to throw 200 gallons of water per minute, and answers the two-fold purpose of extinguishing the fire of burning vessels or pumping out sunken boats of all descriptions. In a late trial trip in low water she made some 16 miles an hour!—fast going—and in deep water it is expected she will even exceed this speed. The Messrs. Watson are largely engaged in the coal business between Pittsburg and New Orleans, and will employ the propeller in towing coal, or if need be, in pumping out sunken vessels, or as a wrecker in the gulf, upon the Balize or elsewhere, for all of which purposes she is expressly designed.

NEW BOAT FOR THE MOBILE AND MONTGOMERY

New Boat for the Mobile and Montgomery Trade.—Captain James Green's new boat for the trade between Mobile and Montgomery is being rapidly constructed at the ship yard of Bill & Payne. She is to have 214 feet length of keel, with 35 feet beam, and 80 feet floor, and as sharp and easy in model as can be constructed. Her power will consist of 28 inch cylinders of 8 feet stroke, with 6 boilers, each 40 inches in diameter; and 28 feet in length. Her cabin and outfit are and 28 feet in length. Her cabin and outfit are to be the most magnificent ever seen on the waters of the Alabama or Bigbee rivers, while in speed she will be hard to equal.

BY TELEGRAPH.

ADDITIONAL BY THE NORTH BRITON. FARTHER POINT, September 3 .- The Atlant Telegraph Company recently deputed Mr. F. W. C. Webb, an engineer of considerable experience in testing and experimenting on telegraph cables, to proceed to Valencia and examine the present to proceed to Valencia and examine the presentate of the Atlantic cable, and his report is pullished in the English papers. After detailing the scientific results of his experiments, he concludes as follows: "I am of the opinion that a serious fault exists about 263 statue miles from Valentia, and that the cable between that spot and this shore is comparatively perfect. Tests from here cannot now decide whether the cable is mechani-cally severed, as all attempts to detect the reception of the most intense currents from the oppo-site shore have long since proved fruitless. Still, from various circumstances attendant on the decline of the insulation, there is every reason to believe the continuity both of the cable and conductor is perfect. Whether any other faults exist beyond the one alluded to, it is impossible to ascertain by tests from Valentia, and the fact that signals received at Valentia were always better than those received at Newfoundland, proves undoubtedly that a worse insulation has always been near Valentia. Therefore, it seems probable that if the fault which exists on this coast, which very likely forms the principal cause of leakage, can be removed, the insulation would be so fir improved as to render the cable again available for signalizing, provided the fault, which is said by those who have tested from Newfoundland to exist near Trinity Bay, was repaired. Gigantic frauds in connection with the extensive Carron Iron Company of Scotland were being brought to light. It is alleged that for a long series of years, the managing portion of the com-pany has been guilty of fraud on the shareholders of unprecedented daring and extent.
